

PLease do not overturn the NJ do not call list law.
I beleive the constitution allows the states rights not specifically taken by the federal government. Also it is really nice not having dinner interrupted or a call wating beep for a telemarketer. If I want to purchase something, I know how to find a vendor with out having them call me. No I do not need new windows, a new roof, my stocks are doing just fine, thank you. Just as thelmarketers clain the right to "free speech" - potentially not to "free" for me as they are trying to get my money- I demand my right not to be verbally assaulted with sales pitches.
If you want an ax to grind, lets get decent broadband coverage to the rural areas of NJ.
